PROJECT Yashobhoomi, Dwarka, New Delhi [IN]

ARCHITECT Masterplan & Design:
IDOM Consulting, Engineering, Architecture
CP Kukreja Architects
Detailed planning:
Arcop Associates Pvt. Ltd.

COMPLETION September 2023

PRODUCTS **Made-to-measure metal ceiling, designed as a hook system**
Triangular panels: 1,000x1,000x1,000mm; triangular perforation: 20x20x20mm; 2mm thickness of aluminium; anodised in metallic gold [11,737m²]

Aluminium wall panels
Panel size: 1,000x3,000mm; triangular perforation: 20x20x20mm; 2mm thickness of aluminium; anodised in metallic gold and silver [3,895m²]

Cylinder made of anodised brass
Lengths: 300-600mm; diameter: 150mm; anodised in brass colour; 3mm thickness of aluminium [1,348 pieces]

Special design of LUMEO
For hexagonal lighting fields; size: 6,000x7,000mm; acoustically effective, perforated cover with 400,000 holes/m² [1,352m²]

Yashobhoomi is a unique and world-class exhibition and conference centre that reflects the multi-faceted architectural heritage of India. In India's biggest conference centre, the modern blends seamlessly with the traditional, as do innovation and craftsmanship. durlum has fitted out this conference centre with a diverse range of products. A made-to-measure ceiling system with triangular panels imbues the golden anodised surfaces of Yashobhoomi with a prestigious and high-calibre atmosphere. The panels of the hook system are suspended in a special structure with positive connection and without torsional stress so no tools are needed when removing them for maintenance work.

The gaze is drawn to the distinctive triangular perforation of the metal wall system. The repeating triangular motif is interrupted in several areas with fine brass-coloured aluminium cylinders in different lengths. They define artistic highlights and the subtly integrated sprinklers and luminaires do not detract from them in any way.

In the ultra-modern auditorium, eyes are drawn to the acoustics-enhancing hexagonal luminaires that play a defining role in the visual impact of this auditorium.

durlum's visually striking solutions for ceilings, walls and lighting are inspired by the culture of India and they blend in harmoniously with the iconic design characteristics of this conference centre, the third largest in the world.
